

## Equipment

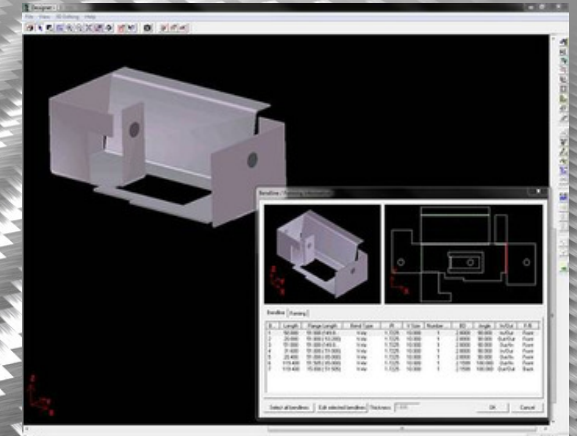

- Amada Pega 255 CNC Turret Punch Press
- Amada AE 255NT CNC Turret Punch Press
- Amada RG35S 4 ft Press Brake
- Amada FAB50 6 ft Press Brake
- Amada M2 3512 4 ft Press Brake
- Cincinnati #10 8 ft 10 Gage Shear
- PEM Serter Series 4 press with 18" throat
- PEM Serter Press with 12" throat
- Perkins #2 Punch Press with hinge cut off tool
- Sport K3 2-Axis CNC Mill
- Victor Horizontal Band Saw with Auto Feed
- Akyapak 70-15/1.0 60" roll with 2-3/4" rolls
- Roper Whitney 36" Slip roll with 2-1/2" rolls
- Taylor Winfield 50 KVA Press type Spot Welder
- Millermatic 252 MIG Welder
- Miller Syncwave 350XL Tig Welder
- Pneumatic Rivet Guns
- Inspection tools, Grinders, and sanding equip.
- Amada 2D/3D CAD/CAM Programming System

We welcome the opportunity to assist you with your fabrication needs. Years of experience and close ties with our suppliers allows us to supply quality parts to your specifications. Shipping via your choice of carrier can be arranged to anywhere in the world.

**Your one source  
from prototype to  
production**

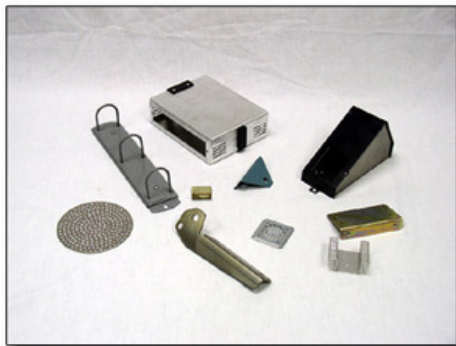

## Sheet Metal Fabrication

We are equipped to manufacture a broad range of products, from simple brackets to complex electronic enclosures. We also offer value added services such as new designs, prototypes, reverse engineering, and redesigns based on cost effective production.

Other services provided include powder coating, plating, anodizing, screen printing, laser cutting, machining, and tumbling.

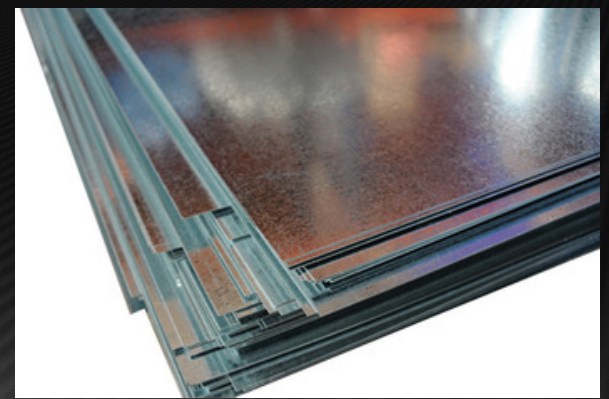

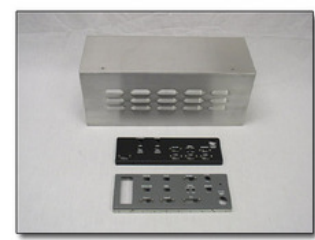

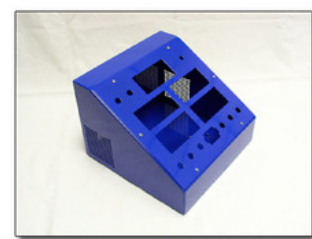

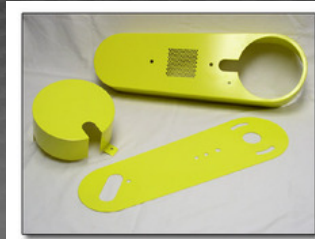

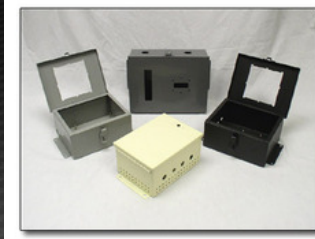

Our flexibility and variety of stocked materials allows for emergency production and fast turn-around on prototypes.

Our extensive turret tooling includes tooling for electronic enclosures, knock-outs, louvers, and extrusions. Urethane press brake tooling allows for mark free bends on highly cosmetic parts.

Our customer base includes manufacturers in the electronics, lighting, ventilation, military, automation, and automotive industries, along with machine shops and other fabricators.

## Some sample work

We stock a variety of sheet metal, including steel and aluminum ranging from 10 gage up to 22 gage, perforated aluminum, reflective aluminum, and pre-painted white steel and aluminum.

We provide installation of self-clinching fasteners, including nuts, studs, standoffs, and specialty PEM fasteners.

We use precision press brake tooling for consistent quality parts.

We offer complete in house assembly using welding, rivets, bolts, hinges, latches, and custom made gaskets.

We use specialized tooling for reduced production costs.
